PART A (realism): for each crop on the class sheet, mark
  Q1 seen in field? O (yes) / X (no)
  Q2 realism 1 (not at all) .. 5 (indistinguishable)

PART B (thresholds): for each subtype sweep (columns labeled by SEMU),
  write the SEMU where it first becomes NOTICEABLE (perception)
  and where it should be REJECTED on the line.

Please answer from your field experience. Thank you.
